

SNARL Unaltered Dog Foster to Adopt Agreement

The dog/puppy you are adding to your family, is being sent home on a foster to adopt agreement. This means that full ownership of the dog/puppy will NOT be transferred until the completion of the spay/neuter, however full financial responsibility becomes that of the adopter. Foster to adopt families are responsible for following the vaccine schedule provided by SNARL and must send proof of additional rounds of vaccines completed within 10 business days of completion to SNARL.

Proof of Vaccines can be sent via email to any of the following email addresses:

contactus@snarllv.org

khuskey@snarllv.org

admin@snarllv.org

Spay/Neuter procedures are to be completed between 16 - 24 weeks of age per Clark County Law, or within 90 days of the signed foster to adopt agreement. Availability and scheduling will be based on SNARL's spay/neuter course schedules. In most cases, your dog/puppy will need to be dropped off a couple days prior to surgery. During this time, your dog/puppy will receive a full physical exam and will be assessed by a licensed DVM to confirm they are healthy enough for surgery. Depending on the spay/neuter course your dog/puppy is scheduled for, they may also have preoperative blood work, ultrasounds, endoscopy, or radiographs done. If your puppy/dog is due for any vaccines at the time of the spay/neuter, those will be administered at no additional cost during their stay with our vet. Please note that additional items such as, but not limited to, hernia repairs, laser treatment, gastropexy, laparoscopic spays, and any other diagnostics testing or special requests will not be included with the adoption.

At the completion of the surgery, you will be notified when your dog/puppy is ready to go home (usually within 1-2 days). If you do not hear from a SNARL representative that your puppy is ready to go home, you can assume the original pick-up date provided to you at the time of scheduling or drop-off is the same.

At the time of pick-up, your dog/puppy will go home with post-operative medication and discharge instructions. You may or may not receive a copy of the medical records for the vetting completed during your pup's Mandatory Medical Week at pick-up. If you do not receive the medical records, please contact your SNARL representative to request a digital copy. Keep in mind medical records from the Mandatory Medical Week can take up to 10-14 days to fully process.

At this time, the microchip and full ownership of your dog/puppy will be transferred. You will be required to limit your dog/puppy's activity for 10-14 days post-surgery. This ensures a safe and smooth recovery. In the event that any post operative concerns arise, please contact your SNARL representative ASAP. Do not contact the Mandatory Medical Week Vet directly.

In the event that you do not comply with SNARL's spay/neuter requirements, or SNARL has been unsuccessful at getting in contact with you in order to schedule the procedure, the dog/puppy will be reclaimed/confiscated by SNARL.

As the Foster to Adopt family, I understand that it is the law for my pet to be sterilized (spay/neutered) by 4 months of age. Sterilization of this pet will be covered by SNARL at an approved SNARL clinic/vet. In the event that you refuse to abide by this law, SNARL will reclaim the pet. Any violation of this law will be considered a misdemeanor with fines up to \$1,000 for each offense. Statute 10.08.132 (Ord. No. 4355, § 4, 11-18-2015)
